

The Microwave Test Benches are precision made microwave systems, which use standard type rectangular wave-guide components to illustrate the essential elements of this field for study.

The equipment consist of :

- A selection of wave-guide components
- The power supply for the microwave source
- A detector
- A meter, which monitors the detector output
- Wall Chart
- Microwave Components Chart

These Training Benches are completely self-contained & provide the means to allow students to carry out practical work at extremely low cost. A comprehensive manual containing extensive microwave theory and a progressive series of assignments is supplied with the Trainer.

Experiments:

- Study of Reflex Klystron
- Frequency, Guide Wavelength Measurement
- SWR, Reflection Co-efficient Measurement
- Impedance Measurement

Instruments:

SKPS	1
VSWR Meter	1

Components:

Cooling Fan.....	1
Detector Mount	1
Fixed Short	1
D.R.F. Meter.....	1
Isolator	1
Klystron Mount	1
Matched Termination.....	1
Movable Short.....	1
S S Tuner.....	1
Slotted Section	1
Tunable Probe	1
Variable Attenuator 20 dB	1
Wave Guide Stand	3

Accessories:

Cable BNC - BNC	1
Mains Cord	2
Op. Manual	1
